

Assignment 1: Introduction

Andrea Gonzalez Natera

OVERVIEW

This exercise accompanies the introductory material in Environmental Data Analytics.

Directions

1. Change “Student Name” on line 3 (above) with your name.
2. Work through the steps, **creating code and output** that fulfill each instruction.
3. Be sure to **answer the questions** in this assignment document.
4. When you have completed the assignment, **Knit** the text and code into a single PDF file.
5. After Knitting, submit the completed exercise (PDF file) to the dropbox in Sakai. Add your last name into the file name (e.g., “Salk_A03_Introduction.Rmd”) prior to submission.

The completed exercise is due on <>.

1) Discussion Questions

1. What are your previous experiences with data analytics, R, and Git? Include both formal and informal training.

Answer: I took John’s Advance GIS class last semester which covered a bit of Git and Python.
My experience using R consist of Betsy’s Stats class.

2. Are there any components of the course about which you feel confident?

Answer: I feel comfortable with the material covered by my stats class such as GLM and ANOVAs.

3. Are there any components of the course about which you feel apprehensive?

Answer: Not so much a component just the workload and time management in general.

2) GitHub

Provide a link below to your forked course repository in GitHub. Make sure you have pulled all recent changes from the course repository and that you have updated your course README file.
